TO WHOM IT MAY CONCERN

We hereby confirm that normal EPA that has been extracted in normal ways will always have DHA associated with it. For pure EPA without DHA(or less than 1% DHA) the EPA needs to be purified so that the DHA is removed.

Chemport produces highly concentrated EPA products such as, CPEA-E70D00 EE (70% EPA/0%DHA), CPFA-E98D00 EE (98%EPA/0%DHA) and CPFA-ED85 EE (85% EPA+DHA) for the pharmaceutical use.

Products

DHA-rich products

EPA-rich products

EPA/DHA mix products

Vitamin-rich products - Aqua Feed

Emulsified products with vitamins - Power Omega

Application

In food products

Omega-3 fatty acids can be added to food products either as pure oil or as microencapsulated. In this way, it is possible to enrich a wide range of food products with omega-3 fatty acids.

Chemport produces both high and low concentration omega-3 fatty acids.

-In infant formula and baby food

For babies to achieve the satisfactory growth and nutrition needed for healthy development, Omega-3 fatty acids must be an essential part of their feeding pattern either directly through mother's milk or through fortified infant formula products.

Chemport recommends CPFA-DHA series for most food application.

-In dietary nutritional supplements

Those whose diets do not provide adequate amounts of Omega-3 fatty acids should take these important substances as nutritional supplements. Chemport recommends both CPFA-EPA & DHA series.

-In feed product

Omega-3 fatty acids can be added to feed products as pure oil or vitamin enriched oil.

Emulsified omega-3 oils vitamins can be used especially for the growth & nutrition of fry and fish.

-In pharmaceutical products

The high concentrations of Omega-3 fatty acids have extensive range of potential therapeutic applications, including the treatment of hyperlipidaemia, arterosclerosis obliterans etc.

Epadel and Omacor, which are pharmaceutical agents consisting of an 98% EPA and 85% EPA/DHA ethyl ester concentrate each, encapsulated in soft gelatine capsules, have been launched and marketed in Japan and Norway respectively.

Specification

Items	Commodity Names	Contents
DHA-rich Products	CPFA-D60 EE	60%DHA
	CPFA-D65 EE	65%DHA
